Prospectus.

The College of the Sacred Heart, incorporated July 23, 1887, by the State of Colorado, and by an Act of the State Legislature, April 1, 1889, empowered to confer University and Collegiate Honors and Diplomas, is conducted by the Fathers of the Society of Jesus. It is intended especially for boarders; half-boarders, however, and day-scholars are also admitted.

SURROUNDINGS.

The College is situated in the suburb of Denver, known as the Highlands, and is about half an hour's drive from the Capitol. The grounds cover an upland tract of fifty acres, and the prospect is one of lakes and mountains and meadows. The Snowy Range of the Rockies seems quite near, and from Pike's Peak to Long's Peak—a distance of about two hundred miles—the mountains are in full view. The diversified and magnificent scenery, and the opportunity for walks, at once instructive and of surpassing interest, leave nothing to be desired for the College in point of situation.

CLIMATE.

The climate of this region is universally conceded to be the healthiest in the United States. Parents in Massachusetts, California, and the far South, have sent their delicate children to this College to the great advantage of their health, without the assistance of medical treatment.

HEALTH AND COMFORT.

The building is four stories high, while its dimensions are 300 feet in length by 76 in width and over 60 in height. The Class-rooms, Dormitories and Study-halls are well lighted and perfectly ventilated ; the play-ground is extensive and beautiful, and there is an abundance of games, both indoor and outdoor. The bath-rooms are supplied with water from the artesian well of the College. Especial attention is given to the physical development of the students. The gymnasium is well appointed, and the boys take systematic exercise daily, under the direction of a master. Athletic sports and games receive every encouragement, and monthly marks are given for proficiency in them. The meals are well prepared and well served.

COURSE OF STUDIES.

The plan of Instruction consists of three Courses, namely: Preparatory, Commercial, Classical.

The Classical Course is the principal course of the College, and embraces the Doctrines and Evidences of the Catholic Religion, Logic, Metaphysics, Ethics, Astronomy, Natural Philosophy, Chemistry, Geology,

Mineralogy, Mathematics, Rhetoric, Composition, Elocution, History, Geography, Book-keeping, Arithmetic and Penmanship ; Latin, Greek and English.

The Commercial Course embraces the same branches with the exception of Latin, Greek, Mental and Natural Philosophy, Ethics and Astronomy.

The Preparatory Course embraces the usual elementary branches of an English education.

MODERN LANGUAGES.

German, Spanish, French and Italian are taught, each by a Professor whose vernacular it is.

OPTIONAL BRANCHES.

Optional Branches, such as Modern Languages, Drawing, Music, Short-Hand, Type-Writing and Telegraphy, if they be taken, become obligatory for a whole term of five months.

SCHOLASTIC YEAR.

The Scholastic Year consists of but one session of ten months, beginning on the first Thursday of September and closing on the last Tuesday of June. The session is divided into two terms, one ending about the last week of January ; the other, about one week before the Annual Commencement Exercises.

SEMI-ANNUAL EXAMINATIONS.

At the close of each term there is a thorough examination of the various classes, in which the students are

examined in all branches studied during the previous half-year. Failure in both examinations debars a student from advancement to a higher class. A student failing in any branch at either of the examinations is not a full member of his class so long as he does not make up for the deficiency.—Competitive exercises are given every month.

WEEKLY MARKS.

Weekly Marks of the student's conduct, application and recitations are registered in books kept for that purpose and read publicly in every class and in the study-halls.

MONTHLY BULLETINS.

At the beginning of each month, Bulletins, showing the student's standing in the Teachers' and Prefects' Departments for the preceding month, are read publicly in the College Hall, and then forwarded to parents. Parents are requested to examine these bulletins carefully.

TESTIMONIALS.

During the year, Testimonials of good conduct and proficiency in both departments are given to the most deserving.

GENERAL REGULATIONS.

ADMISSION.

Parents, in making application for their children, must state precisely the age of the candidate for admission, and if they be not personally acquainted with some

member of the Faculty, they are required to present satisfactory testimonials of his moral character, as the College Authorities decline to receive applicants whose morals are not irreproachable, or who are over fifteen years of age. No one will be admitted for a shorter period than five months.

RELIGIOUS TRAINING.

Difference of creed is no bar to admission. Uniformity of discipline, however, demands of non-Catholic boarders that they should be present and behave properly at Divine Service. The practice of monthly confession and Communion is insisted upon for Catholic students, and Holy Mass opens the duties and exercises of the day.

DISCIPLINE.

The government of the institution is mild rather than severe ; but strict obedience, assiduous application and blameless conduct are positively required of every student. Any serious fault regarding these essential points renders the offender liable to effective correction, and even to dismissal, if this be deemed necessary.

For faults of ordinary occurrence, such as tardy arrival, failure in recitations, or minor instances of misconduct, detention after school, some lines to be committed to memory, and low weekly marks, are usually found sufficient penalty.

The students are forbidden to leave the College grounds without permission.

No student is allowed to have books or publications which have not been approved by the Prefect of Studies.

POLITENESS.

The College expects from all its students the manners and deportment of perfect gentlemen. Politeness is deemed a very important element of education. On the premises, smoking, tobacco-chewing, low or profane language, rough, uncouth games of any sort, are not tolerated.

LETTERS.

The College Authorities reserve to themselves the discretionary power of inspecting all letters, books, etc., either directed to the pupils or sent by them.

VISITORS.

Visits may be paid to the students on Tuesday, Thursday and Sunday afternoons. Parents and friends are most earnestly requested not to call at other times, unless it be strictly necessary. No visitors will be allowed to see a student unless they are known to the College Authorities or come with a letter of introduction from the parents or guardians.

WEEKLY HOLIDAY.

Tuesday and Thursday afternoons are ordinary holidays, except when the preceding or following day is a holiday.

HALF-BOARDERS AND DAY-SCHOLARS.

Half-boarders study, dine and lunch with the boarders. Half-boarders and day-scholars must not be kept

at home, nor detained on school days, except for grave reasons. In case of absence or tardiness, a note of excuse from parents or guardians is invariably required.

Day-scholars are not allowed to associate with boarders more than is absolutely necessary in class and College exercises.

It is strictly forbidden to take out letters or go on errands for boarders.

The classes begin at 8:30 a. m. and continue until 11:30. They are resumed at 2 and continue till 4:15 p. m.

Free Scholarship.

The Board of Trustees, at their meeting on May 15, 1889, resolved to offer a free scholarship for day-scholars in the Classical Course to one successful competitor from every parochial school within the city limits, on the following conditions :

1. The competitor should not be under 10 years of age.
2. He must be examined in the usual elementary branches of an English Education.
3. The holder of such free scholarship must never show himself unworthy of the privilege, on account of misconduct, want of application to study, or lack of talent.
4. This year the examination will take place at the College, on August 25, at 10 o'clock, A. M.

THESES.

- I—The desire of happiness, ample and complete, is the
main spring and first moving power of all human
actions. It is not planted in man by the defect, but

by the perfection of his nature, and in view of its full satisfaction.

- 2—The object of man's perfect happiness is God, known and loved in a future life. The present life being only a tendency and a journey to the next, will find a proportioned happiness in the fulfilling of those duties which are commanded in order to reach the eternal one.
- 3—An act is rendered less voluntary by ignorance, by passionate desire and by fear, when these precede the act of the will.
- 4—The morality of any given action is determined by three elements: the end in view, the means taken and the circumstances that accompany the taking of said means.
- 5—Passions considered physically are good; morally, they are neither good nor bad in themselves, but they become good or bad according to the use or abuse which the human will makes of them.
- 6—Anger is a compound passion made up of displeasure, desire and hope,—displeasure at an undeserved slight, desire of revenge, hope of getting it. It is quite different from hatred. Anger wishes evil as just and public. Hatred wishes evil as evil, and in secret. Anger stops when sufficient satisfaction is given, and rejoices at the evil corrected. Hatred stops only at the destruction of the enemy, and rejoices at the evil done. Anger, especially in superiors, may be good; hatred is always intrinsically bad.
- 7—There are four Cardinal virtues: Prudence, Justice, Temperance, Fortitude. Magnanimity though in reality a potential virtue of fortitude, is, according to Aristotle, "a sort of robe of honor to the rest of the virtues: it both makes them greater and stands not without them."
- 8—There are some human actions which are intrinsically good and some intrinsically bad. The former can never be bad, the latter never good. Their intrinsic

difference does not arise from the will of God, and much less from human laws, or human institutions, but from the very nature of man. They are commanded or forbidden because good or bad in themselves, and not vice-versa.

- 9—Kant's "categorical imperative" or "autonomy of reason" or "independent moral" is, in theory, either the deification of human reason and human will, or the negation of God's wisdom and holiness: in practice it is virtually the annihilation of all morality.
- 10—The divine intellect, thoroughly knowing the imitability of the divine essence, expresses formally the archetypes and patterns according to which creatures can be created, and the end for which they should be created, and their way of acting for the attainment of such an end. The divine will freely determining itself to create, cannot create but according to those archetypes, and to that end, and to those means to the end. This act of the divine will, ordering the way of acting of creatures to their end is in God the Eternal Law, which applied to the necessary actions of creatures is called the Physical Law of nature, and applied to the free actions of rational beings, is called the Moral or Natural Law.
- 11—Natural law is required by the very nature of man; it is more or less perfectly known to all men, according to their greater or less intellectual development. Immutable in itself and equally binding every man, it may be different in its application, on account of the difference of the practical judgment, by which it is applied by different men.
- 12—A man is always wrong when acting with doubtful conscience—when, however, he has used such moral diligence of inquiry as the gravity of the matter calls for, and still remains in a state of honest doubt as to whether there is a law binding him, in that mental

condition, he is not bound by the law even when objectively there is a law.

- 13—The loss of perfect happiness, and the state of corresponding misery in a life to come, is at the same time a natural result of, and a divine punishment for the transgression of natural law. Philosophers can give only most probable reasons to prove the eternity of such a state. Revelation alone can give and does give a definitive answer to the question, stating most positively that it is eternal.
- 14—Punishment is not only prospective but retrospective. Its functions are not only medicinal to the individual who is punished, and deterrent to the community witnessing the punishment, but also and especially retributive for past deeds even though they should never occur again.
- 15—The human soul not only has no intrinsic principle of decay or decomposition in itself, but it is also independent of matter in its operations, and in its existence. It is immortal.
- 15—To know God, to serve and to love him not only with interior acts, but with exterior, both individual and social, is the most important precept of the natural law.
- 17—It is never allowed to kill directly an innocent man. When however, his death is neither intended as an end, nor as a means, but follows only incidentally and against our intentions, we may in urgent and important cases overlook it.
- 18—We are allowed to protect our rights even to the death of an unjust aggressor, provided it is done with the moderation of blameless defence.
- 19—Suicide or the direct compassing of one's own death, is intrinsically evil and therefore never lawful.
- 20—Duelling involves the malice of direct murder, and of direct suicide, and it is a poor display of the logic of the combatants: therefore it is not only intrinsically bad, but also supremely ridiculous.

-
- 21—Though a lie on account of its intrinsic malice is never lawful, yet a *broad* mental reservation being in reality quite different from a lie, is in important cases not only lawful, but commanded.
- 22—Charity to our neighbor, both friends and enemies, is quite different from passionate love and from philanthropy. It differs from the first because it is not a sensitive, but a spiritual act. It differs from the second, because it is elicited with a higher motive.
- 23—Marriage is a society intended by nature for the double purpose of the generation of children and of mutual fidelity and love of parents. Polyandry and Polygamy, though in different degrees and for different reasons, are both against the natural perfection of marriage, which must be society of *one* with *one*.
- 24—The good which nature intends from the matrimonial tie cannot be fully obtained without its indissolubility, which therefore is commanded by natural law.
- 25—By natural right a man may acquire private property and keep it for himself and for his heirs. The theory of Communism is a dream of a sick brain—that of Socialism is one of injustice to present proprietors, of fraud to poor people and of plague to society.
